Copyright 2016-2022 © - ANDROID™ PLUS 1 - Copying website materials is strictly prohibited For the third installment of the wildly popular Bully: Anniversary Edition Mod Apk, developer Trendsoft has improved upon the original game with an all-new multiplayer mode. This time around, players can choose to play as a male or female student who wants to take down one of their school's bullies. As in the single-player version, the objective is still to eliminate the bully, but this time, you'll have help coming your way from other students throughout the school - as well as a new tool to help you out. If you're like me, you know how much bullying can take a toll on a person's mental health. Let's just say this... it doesn't have to be that way. The new bully anniversary edition apk is just what the name suggests. It's a completely new game where you, as the school bully, have to stop her from getting even more revenge on the students who made her mad in the first place. You will stop her by sending her a message in the form of an android game. There are three difficulty levels and a total of eight levels to beat. If you think that this is too easy, well, let me tell you, there are more advanced ways to deal with her that will leave her speechless. Alternate Games: LabBuster Mod Apk The new mini-games included in this update for Bully: Anniversary Edition is not only filled with hard-hitting content but also with humor. Some of these have even been adapted into movies, so that you can laugh at the things happening on screen! These include the school lock-in and the peanut butter and jelly game. However, the one game that I would say is most hilarious - in which you get to physically fight back against the bullies - isn't really included in the package, but it comes with the package. The school yard fightback mode in this year's version of Bully: Anniversary Edition features a game called Battle Arena, which sees you dressing up in your uniforms and choosing different uniforms of your opponent as well as weapons and attire. You are then given 30 seconds to attack other students in the arena with whatever you have at hand. You are also given the chance to try to make the worst school officials angry before they put you in prison. That's right, if you get three minutes to prep your fighting outfit, prepare to do battle against some of the worst school officials around. Some of the other challenges that you will be faced with include the "ugly punter" mini-game, where you'll have to send an ugly punter to his room. The other challenge awaits you in the award ceremony-themed "scholarship Edition". This game requires you to find a scholarship from the office before you can enter into it. However, there are a few loopholes here too, as many of the college names mentioned in the game are not actually present in any real colleges. Thus, you have to make use of your guesswork in here as well. A unique feature of this version is the fact that you are allowed to choose your own voiceover for the android game. There are four voiceovers namely" bully", "school president", "policeman" and "school trustee". For the school president, you have the option to change from female to male voice and for the other leaders, you have three options. The mod-data pack enables you to set the level of bullying you want to play. You can either do it once you have reached the required level or every time you go up a level. You can also use the bully cheat in the android device to increase your points. All you need to do is download and install the Bully: Anniversary Edition Apk onto your android device, run the game and enjoy the fruits of your labors. There are no direct downloads from the internet because the application needs to be installed from your gadget's internal memory. Once the app is installed, the application will automatically run in the background without you having to log into the game every time you boot up the device. This is a great feature as it helps you save battery life as well. Apart from the android games, the game also comes with some bonus features. For example, you will get complete bully packs which come with different content such as videos, wallpapers, images, mugs, trophies, and so forth. If you want to test the android games on your smartphone, you can use the free trial version to do so. Moreover, users can also join some forums that will help them get better knowledge about the application and its features.You can also use the bully cheat in the android device to increase your points.
